

Abigail Paulus

abbypaulus@icloud.com | 954-798-7482 | abbypaulus.github.io/links

Ambitious, detail-oriented mechanical engineering student focused on drafting, aspiring to be a design engineer

Education

B.S. in Mechanical Engineering, Minor in German | Florida Atlantic University, Boca Raton, FL May 2028

Awards: \$1,000 CSYS Scholarship (2024), Outstanding Engineering Achievement Award (Fall 2024 & Fall 2023), Cambridge AICE Diploma (2023)

Skills & Qualifications

Certifications: Solidworks, DraftSight, AutoCAD, Inventor, Fusion360, Excel, Word, PowerPoint, Photoshop, HTML, CSS, JS, Test Out IT

Technical: Soldering, FDM 3D Printing, Calipers, Power Tools, Drill Press, Woodworking, Weldments, CNC Programing, GD&T

Software: SketchUp, RapidHarness, Siemens NX, Solidworks PDM, ERP, AS400, Illustrator, Inkscape, Cura Slicer, Altium Designer, Blender

Professional Experience

INCOMING Product Design Engineer Intern | SharkNinja, Needham, MA May 2026 – Aug 2026

- Generate new product concepts through design studies, while collaborating with cross-functional teams, to innovate solutions
- Build and test quick turnaround, low fidelity prototypes, and be able to build key findings on user testing with them

Supply Chain Documentation Intern | Dometic, Pompano Beach, FL Oct 2025 – Present

- Organizing import, export, and finished goods documentation of 13,2200+ exported products and components in Excel
- Maintaining documentation in Word and Adobe Acrobat for audit trail in efforts to recover est. \$500k in tariff reimbursement

Engineering Documentation Intern | Dometic, Pompano Beach, FL May 2025 – Sept 2025

- Prepared, maintained, and updated 75+ Draftsight, RapidHarness and Solidworks drawings for components, layouts, assemblies
- Communicated with test engineers to produce custom crate drawings using weldments in Solidworks to manufacture in house
- Administering, maintaining, and updating DCR, PSR, RCR, NRP, ECN, ERC, and other product information within AS400
- Tracked/assigned part numbers and BOM for products up to date, maintaining product information documentation using Excel

Mechanical Engineer Intern | Q'Straint, Oakland Park, FL June 2024 – Aug 2024

- Designed metal support brackets for in-house production using SolidWorks' sheet metal tool and design intent
- Tracked 200+ unused inventory parts using Excel, finalized 10+ drawings in Solidworks, and fulfilled 2 work orders
- Drafted 25-page service manual in Word, increasing technicians' efficiency, reducing costs, and improving convenience
- Enhanced UX/UI, optimized, hosted website on GitHub (plans to use SQL and PHP, adding features to improve communication)

CAD Engineer Intern | Q'Straint, Oakland Park, FL June 2023 – July 2023

- Updated 10+ outdated technical drawings to match current standards, replacing to use existing inventory, reducing cost
- Authored 6 pages of instruction manual using Word, also serving as template for similar components across product line
- Use up existing inventory by developing McMaster Carr replica, reducing cost, and efficiently filtering 150+ small hardware parts
- Edited/enhanced 16 pages of introductory engineering handbook in OneNote, facilitating smoother onboarding process

Projects

Electric Campervan Conversion Oct 2025 – Present

Developing modular plumbing, electrical, and HVAC systems for electric Chevy Brightdrop 600 van chassis to convert into campervan, designed using Siemens NX, with 15kW of additional onboard power, 35 gallons of water, charged by 600W of solar

Digital Audio Player July 2024 – Present

MP3 player reverse engineered using Raspberry Pi with custom PCBA and CNC machined chassis practicing DFM/DFA (design for manufacturing/assembly), analyzing consumer needs, prioritizing features most valuable and reiterating different prototypes

Blind Spot Sensor for Motorcycle/Bicycle Dec 2023 – Feb 2024

Designed concept in Fusion360, with 4 FDM prototypes, ensuring proper fit of existing components found in premade starter kit to develop Arduino based modular system that detect objects within a biker's blind-spot, with vibrating motor module on the helmet

Bar-top Display Stand for Teacher's Lounge Mar 2023 – Oct 2023

Arranged cut list using Excel and drafted assembly drawings within SketchUp, while managing team of 3 with effective communication, to design and build custom wooden bar-top, optimizing material selection, leaving 30% of \$1000 budget

Leadership Experience

Technical Outreach and Community Help (TORCH) Chair | National Society of Black Engineers (NSBE) June 2025 – Present

Internal Development Chair/Secretary | American Society of Mechanical Engineers (ASME) Jan 2025 – Present

Academic, Professional & Athletic Chair | Alpha Omega Epsilon (AOE) Jan 2025 – Present

Volunteer Coach (Seasonal) | Coral Springs Youth Soccer (CSYS) Nov 2021 – Present

President/Vice President | Southeastern Consortium for Minorities in Engineering (SECME) June 2022 – 2024

Active Club Membership: SWE, SHPE, Women in Engineering and Computer Science, Technology & Aerospace Club (SEDS)
